

亞洲風格的 Diceware 密語詞表

An Asian-flavored Diceware wordlist

anoni.net

特色亞洲字詞 / Featured Asian loanwords

tofu	ramen	matcha
kimchi	bibimbap	typhoon
oolong	boba	wonton
ketchup	curry	mango
yoga	karaoke	tsunami
emoji	ninja	zen

字典查證入選的亞洲外來語 / dictionary-attested, hand-picked

anoni.net

v0.4.0

關於這份字典表

一份 Diceware 風格的密語詞表，混合好拼好記的常用英文字，以及有字典背書的亞洲外來語。擲骰子或用亂數抽幾個字，就是一組好記又夠強的密語，全程不用電腦。

什麼時候用

- 密碼管理員、email 等重要帳號的主密碼。
- 全磁碟加密與開機密碼。
- PGP 金鑰、加密備份、Tails 持續磁區的通行碼。
- 需要唸出來或手抄傳遞的密碼，好唸好拼、不易抄錯。
- 在不信任的電腦旁，用實體骰子離線產生，全程不經過任何裝置。

怎麼用

1. 擲 5 顆骰子，由左到右讀成五位數（每顆 1-6）。
2. 在查表找那個數字，抄下對應的字。
3. 重複 6 次，用「-」把字連起來。
4. 六個字的組合多到天文數字，就算電腦每秒猜十億次，平均也要上百萬年才猜得中，足以保護重要帳號（約 77.5 bits 的強度）。

例：6 3 4 4 4 → 63444 → tofu

務必用真的骰子或密碼學亂數，不要自己挑字。

還可以怎麼用

- 兩人暗號：見面時一起擲一組字、各自記住。日後互報這組字，確認對方是本人。暗號要保密，最好一次性使用。
- 把號碼唸成字：要核對一串數字（像金鑰指紋）時，用這張表把號碼換成字來唸，比唸一長串數字不容易聽錯。

這張表本身是公開的、不提供加密，只是讓共用的數值好唸好核對。安全與否取決於你怎麼交換與保管那個數值。兩人也要確認用的是同一版（核對封底的版本與 SHA-256）。

About this wordlist

A Diceware-style wordlist that blends easy-to-spell common English words with dictionary-attested Asian loanwords. Pick a few words with dice or an RNG and you have a strong, memorable passphrase — no computer required.

When to use it

- A master password for a password manager, email, or other key account.
- Full-disk encryption and login or boot passwords.
- Passphrases for PGP keys, encrypted backups, or a Tails persistent volume.
- Passwords you read aloud or copy by hand — easy to say, spell, and type.
- Generating offline with real dice beside an untrusted computer (air-gapped).

How to use

1. Roll 5 dice, read left to right as a five-digit number (each die 1–6).
2. Find that number in the table and copy the word next to it.
3. Repeat six times and join the words with “-” .
4. Six words make so many combinations that a computer guessing a billion times a second would need millions of years on average — plenty for important accounts (about 77.5 bits).

e.g. 6 3 4 4 4 → 63444 → tofu

Always use real dice or a CSPRNG; never hand-pick.

Other uses

- A recognition phrase for two people: roll one together in person, each keep it, and later exchange it to confirm you are really each other. Keep it secret; use it once.
- Reading a number aloud: turn a value like a key fingerprint into words with this table — easier to dictate than raw digits.

The list adds no encryption by itself; it only makes a shared value easy to compare. Security depends on how you exchange it, and both sides must use the same version (see the back-page SHA-256).
